Hamburg, 23rd September 2009: At the 24th EU PVSEC in Hamburg ib vogt GmbH, Berlin/Germany, was honored with the Solar Industry Award 2009 as “Factory Solution Provider of the Year”. Carolus Kerber, Director of Engineering, took the award on behalf of the founder and CEO Dagmar Vogt and the whole team.

ib vogt, leading international service provider for planning and realization of photovoltaic factories, feels honored to receive the award even in the current difficult economical situation of the PV industry. Dagmar Vogt takes the award as appreciation of the accomplishments achieved over the last years: „We are very proud to have contributed an important part to our customer’s success with our innovative and sustainable solutions and concepts. And of course, we are delighted that our customers have been believing in us and in our work for many years.“ During the last years ib vogt has realized more than 1,2 GWp production capacity. The company’s experience and specialised know-how covers the entire range of technologies available on the market: wafer, cell, module, crystalline, or thin-film technology. References of ib vogt include international projects for Q-Cells, Sovello, T-Solar and Sunfilm.

About ib vogt:

ib vogt has been planning, realizing and optimizing factories for the solar industry for more than ten years. Since 2008 ib vogt GmbH is a member of vogt group SE. In addition to realizing factories vogt group offers a lot more specialised services for the solar industry, for example process and cost optimization of running productions as well as development and realization of PV power plants.
